

SCHALLER LOCKING MACHINE HEADS

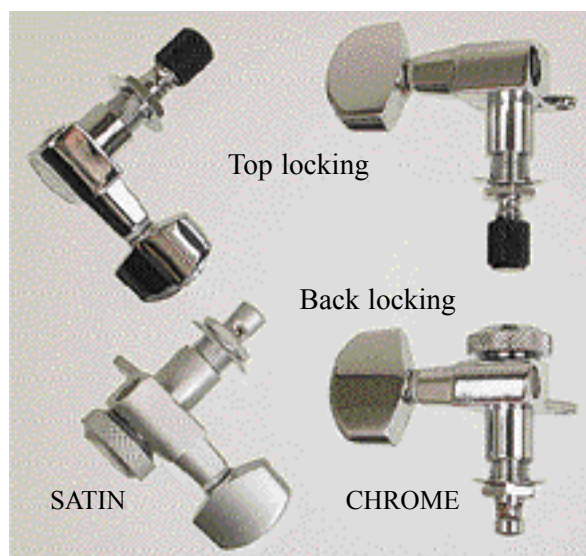

LOCKING MACHINES

A choice of 2 systems by Schaller to lock the string, easily and swiftly, particularly when using tremolo units. They provide an alternative to string clamps or locking top nuts and also speed and facilitate string changes.

Top Locking Machines

A knurled cap screws down and locks the string within the machine head. No tools are required.

- 5502LK** M6A, chrome plated, 3L3R
